

## **PRESIDENT OF COMMUNICATIONS TECHNOLOGIES INCORPORATED INVITED TO CONVENTION RESERVED FOR INDUSTRY LEADERS**

*Jeff Allen, President of Communications Technologies Incorporated, to Share His Vision on the Future of Unified Communications*

BURTON, MI — May 24, 2012 — Communications Technologies Incorporated, a leading provider of unified communications, announced today that President, Jeff Allen, has been invited by Technology Assurance Group (TAG), an international organization representing nearly \$350 million in products and services in the industry, to share his vision on the future of unified communications with some of the industry's top manufacturers, vendors, suppliers and resellers at TAG's national convention. The 12th Annual TAG Convention will be held in New Orleans, Louisiana on September 9th-12th.

With more and more businesses headed to the cloud, networking and IT infrastructure has grown substantially more complex in the past year. Today's unified communications providers require unprecedented levels of technical expertise, industry foresight and customer service in order to remain competitive. Communications Technologies Incorporated has been invited to

attend this year's convention due to its superiority in each of these areas.

"Communications Technologies Incorporated has dominated their marketplace for quite some time," states Brian Suerth, Executive Vice President & Partner of TAG. "They are continually striving to stay on the leading edge of technology, and that's why no one can compete with them. Communications Technologies Incorporated knows what's coming down the pipeline and how it's going to ultimately affect their customers. That's why they are able to proactively support their customers and implement powerful technologies before their competitors even realize that they're behind the curve."

Several industry topics will be covered at the convention and best business practices will be revealed in areas ranging from cloud technologies, virtualization, hosted solutions, managed IT services to customer service. "The only constant in life is that it never stops changing. It's no different in our industry," commented Jeff Allen, President of Communications Technologies Incorporated. "That's why we

continue to remain active in the industry and share our views at these kinds of events. We always come back to the office with something new and valuable that we can pass on to our customers. We're passionate about what we do and we feel that it's our duty to our customers to find out what's on the horizon. We're often able to leverage new developments and find ways to boost our customers' productivity, and more importantly, their bottom line profitability."

Communications Technologies Incorporated is among the top unified communications providers in the nation and its success is due largely to its innovative approach to business.

### **ABOUT COMMUNICATIONS TECHNOLOGIES INCORPORATED**

Communications Technologies, Inc. (CTI) is an independently, locally owned voice and data communications company serving Michigan businesses for over 20 years. CTI is a one-source solution for ordering dial tone and high-speed Internet, providing voice

and data cabling, and installation and support of business telephone systems and computer networks. The company takes a consultative approach to its customers' needs and makes recommendations based on over 100 years of combined experience and expertise. CTI actively supports the community through its involvement with non-profit and other charitable organizations. CTI's goal is to add value, differentiate its services, and deliver strategic technologies with integrity and innovation resulting in the highest level of customer

profitability, satisfaction and competition advantage. For more information about CTI please call 800-860-6910 or visit [www.cti4u.com](http://www.cti4u.com).
