CTI Receives Cybersecurity Certification

*Leading Unified Communications
Provider Protects Local Businesses
From Cyber Attacks*

Burton, MI – September 28, 2017 - CTI a leading provider of unified communications has announced that the company is certified to provide cybersecurity solutions to SMBs (small to mid-sized businesses) to protect them from the barrage of cyber-attacks that occur every day. Cybercrimes are a serious threat and most businesses cannot afford to become the victim of malware, ransomware, phishing, password attacks, denial-of-service (DOS) attacks or malvertising of any sort for a prolonged period of time. Recent advancements in preventative technology have helped SMBs safeguard themselves from unnecessary attacks, network vulnerabilities and company downtime that can often result from such disruptions.

CTI invests heavily in its staff of IT professionals, in order to insure that everyone is highly trained, highly certified and fully equipped to protect customers from cyber-attacks. “It’s incredibly important to continually invest in our people,” stated Jeff Allen, President of CTI. “When we invest in our technicians’ technical abilities, we

are investing in our customers’ safety. This is why we’re constantly watching the technological horizon and educating our team so that when our customers need help, they are working with a world-class expert, not just some person who dabbles in IT.”

Most business owners are usually more focused on conducting revenue generating activities, instead of assessing potential IT vulnerabilities. This is why many SMBs have opted to outsource their IT to an external managed IT services provider; simply because they don’t have the time, expertise nor inclination to become an expert in these facets of business. By partnering with a trusted IT advisor, whose sole mission is to remain one step ahead of hackers, SMBs can remain focused on their top priorities and continue to grow their organizations to new heights.

“The security landscape is constantly changing in order to stay up with the latest global attacks. Since education, research, and development has been a cornerstone of CTI, the company is able to stay a step ahead and provide the right guidance to customers to properly secure their

networks now and into the future,” add Mr. Allen.

About CTI

Communications Technologies, Inc. (CTI) is an independently, locally owned voice and data communications company serving Michigan businesses for over 25 years. CTI is a one-source solution for ordering dial tone and high-speed Internet, providing voice and data cabling, and installation and support of business telephone systems and computer networks. The company takes a consultative approach to its customers’ needs and makes recommendations based on over 100 years of combined experience and expertise. CTI actively supports the community through its involvement with non-profit and other charitable organizations. CTI’s goal is to add value, differentiate its services, and deliver strategic technologies with integrity and innovation resulting in the highest level of customer profitability, satisfaction and competition advantage.
